## Why is patterning important??

\*Positive Parent-Child Relations

Creating, extending, naming and talking about patterns help build strong mathematicians. Even the most scholarly mathematicians can be challenged with study patterns. In many classrooms, students of all ages learn about patterns at the

beginning of their school year. Patterns are the heart of math. The ability to recognize and create patterns help us make predictions based on our observations. This is an important skill in mathematics. Understanding patterns

help prepare children for learning complex number concepts and mathematic operations.

**Teacher Haley's last day.**

Teacher Haley's last day will be October 6<sup>th</sup>. We will miss her terribly as she goes on her path working at Goetchhe Wellness Center. We wish her all the luck in the world and hope to see her around.

**Calendar:**

Please check our calendar for some fun events coming up! If you go to any of the listed activities please let us know as we can get in kind for those events.

**Moving our Cubbies:**

We have come to the conclusion that the cubbies are not working in the hallway for inclement weather. It has been a challenge to get coats, hats and gloves. So, we are going to move them into the Classroom to make these transitions easier for the teachers and the students. Thank you for understanding.

**“What makes you different is what makes you beautiful”**

**Career Day:**

To go along with our theme of neighborhood and career workers we are going to dress up as what we want to be when we grow up on **October 11<sup>th</sup>**. We will also be having visitors from the Fire Department, Ambulance, Sanitation and the Powell Police. We are going to have a lot of fun learning about our community and jobs.

**“Have BIG dreams---You will grow into them”**
